

Susan Kemmerer
Schoolhouse Academy Thursday School
659 Schoolhouse Road
Telford, PA 18969

This spring (2019) I am offering 2 courses for grades 7-12. My goal is to equip your students to function in an increasingly hostile culture, to build confidence, and to solidify their faith in God.

Logic: This popular, highly-acclaimed course for high school or mature Jr high students is an informal study of logical fallacies. A Schoolhouse Academy favorite! **Logic** is *designed* to help your student recognize and identify logical fallacies in every-day situations, discussions, political speeches, and advertisements. Your student faces unreasonable and illogical thought processes on a daily basis as he takes his place in society, and many of the arguments he faces are passionately and persuasively presented. Your student needs tools to recognize and successfully address these fallacies. Upon successful completion of this one semester course, your student will have earned a ½ credit in logic, which can be considered part of his/her language arts, or as an elective. **Logic** will be held (tentatively) from 9:30-10:30 on Thursdays (spring semester) and costs \$75/student. Your student will need an *Art of Argument* workbook (which can be ordered through me).

Worldview Apologetics: In a very short time, your student will be leaving the safe environment of your home to be exposed to and drawn into the thinking and culture of the world. This exciting new social studies course will give your student a look at various worldviews and religions. It will ground your child in knowledge of Scripture and to help him always be ready with an answer for the hope within him (1 Peter 3:15). Our faith isn't blind. It is infinitely reasonable and logical, engaging the intellect. How do we know the Bible is God's Word? How can we claim Jesus is the only way to heaven? Why would a good God allow such unspeakable evil in our lives? Are there contradictions in the Bible? Christianity is THE only intellectual, logical, and reasonable worldview that consistently and without contradiction answers these questions and many more. My hope is that your student will gain confidence in his faith and boldly prepare to be a light in this dark world. This is a course your student will never forget! Class will take place on Thursdays tentatively from 8:00-9:30 (spring semester) and is for mature Jr high and high school students and costs \$125. (1/2 credit in social studies or an elective)

Tutoring: I am offering private tutoring to (elementary/high school) in math and language arts, occasional sessions as needed or regular sessions. I charge \$20/half hour or \$30/hour.

I have been homeschooling my own 9 children (8 already successfully graduated) for 30 years and authored several books, including **Homeschool Supermom...Not!** I have taught co-op classes in my home for 20 years. Classes are held Thursday mornings in a warm, encouraging environment in my home in Franconia (just down the road from County Line Nursery).

Please message or contact me in any of the following ways if you'd like to sign your student up for classes or if you have questions.
